

Furniture for people

The classic: S 2000 *Classic*

Turning bolt latch:
For padlocks, bolt size 4.5 - 6.5 mm

Easy-to-sweep compartment shelves:
Models with front-mounted or lowered bench base have cleaning openings instead.

S 2000 Classic from C+P offers more than you would usually expect. Why? Because as the steel locker market leader, we strive to keep one jump ahead at all times.

The tried and trusted complete range.

The ventilation concept, bases, range of accessories or lock variants: The timeless classic from C+P has been setting standards in the basic class for decades.

Durable steel construction:
Right-hung doors, pivot hinges with vertical box reinforcement, louvers and stamped label holder.

The areas of application where the C+P classics can be put to good use are virtually limitless: Industry, workshops, gyms, wellness, retail or business: S 2000 Classic guarantees tidiness and security and offers unique value for money.

The Classic ventilation concept:
Works perfectly through the recessed base even with this locker variant – thus providing a clear advantage over the ventilation specified by DIN 4547!

Protected and adjustable:
The plastic feet provide added corrosion protection and are optionally height adjustable!

Matching benches with coat rack:
Made of sturdy rectangular tube,
with comfort hooks and optional
shoe rack.

**For laundry
and room cleaning:**
The laundry locker, cleaning
equipment cupboards and
storage cupboard match
perfectly.

The furniture for locker and wardrobe areas has to be extremely versatile: Single or double tier compartments, Z-combination lockers, lockers with large or small compartments, matching bench solutions, ancillary storage space – and last but not least there is the issue of the right fittings and accessories.

Versatile tidiness experts.

No matter what the requirements: S 2000 Classic can adapt to them.

Practical: The widest choice of bases – ranging from classic feet or plinth solutions to benches mounted beneath the locker – depending on the intended use.

The right solution to every requirement:
Classic assembled box lockers are available in three different compartment heights and two different compartment widths.

Slot-in hat shelf and special coat rail:
Oval profile with swivel free sliding hooks for system mounting, e.g. for coat hangers or lockable partition wall. What a clever idea!

Well thought through.

The Classic ventilation concept

works perfectly through the offset base even with this locker variant – thus providing a clear advantage over the ventilation specified by DIN 4547!

The difference is in the detail! S 2000 Classic offers much more than you expect. Clever and well thought through – typical C+P.

The air inlet at the rear base ensures good ventilation and drying in the compartment. In the case of lockers on plinths, the air is inlet through openings above the offset plinth.

Locker with additional fittings:

Plastic bench slats, cylinder locks, number plates, perforated panel doors and slope top add-ons.

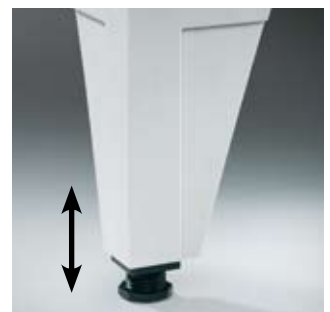

Practical additional fittings

Locker with integrated slope top:
The locker is approx. 200 mm higher at the back, slope angle approx. 21°.

Slope top add-on:
Approx. 230 high at the back, can be retrofitted, slope angle approx. 26°.

Special plastic feet for improved corrosion protection:

Classic feet are 150 mm high, made of sturdy plastic. They are available with standard floor gliders or additionally with height adjustment screws for easy levelling of the locker.

Accessories in the locker

Partition beneath the hat shelf:
Made of steel, fixed installation.

Coat hangers:
With special attachment, made of hardwood varnished black.

Interior security compartment:
Instead of the hat compartment. With cylinder lock. Available for compartment widths of 300 and 400 mm.

Additional shelf:
Installation height approx. 250 mm. Cannot be height adjusted or retrofitted.

Accessories on the door

Mirror:
On the door interior, size approx. 110 x 90 mm.

Label holder:
Made of plastic, self-adhesive.

Comfort label holder:
Self-adhesive design alternative made of transparent plastic, with larger inscription field.

Door opening limiter 90°:
Made of sturdy round metal. Attached at the top to prevent impairment of locker use.

Mechanical locking systems

Turning bolt latch:
For padlocks, bolt size 4.5 - 6.5 mm

Cylinder lock with 2 keys:
Optionally available with master key function. Available with or without Astralon number plate.

Mechanical combination lock:
With 4-digit, adjustable combination. Stable cast-iron housing for a long service life. "Infinite-turn" mechanism.

SAFE-O-MAT lock:
As deposit or token-operated lock with practical twin-coin function.

It's your choice.

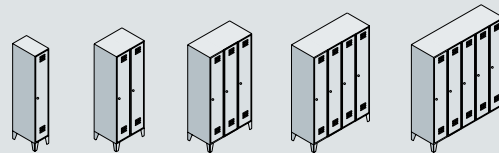

One solution to all requirements? That was once the case. You can find the perfect locker for every application in the S 2000 Classic range. You can bet our range has the right one for you, too.

Your C+P furniture adviser will be glad to give you more information and to demonstrate the ideal solution for you.

A good combination.

You can choose from many attractive colour coatings at C+P as a standard feature. We are also always glad to fulfil all your own particular colour wishes. You can find the entire range and additional information about colour design in the latest catalogue. Have fun choosing!

Smooth finish doors:
Without louvers, without label holder. Please ensure alternative ventilation, e.g. rosette hole patterns.

Louvers:
Three louvers each at the top and bottom of the door. Standard on all lockers with full length doors.

Stamped rosette hole patterns:
One rosette hole pattern each at the top and bottom of the door. Standard on all double tier lockers.

Door with perforated panel:
Square hole pattern 23 mm with 5 mm bars. For all lockers with full length doors.

Door colours/Colour highlights:
Vivid or muted shades are suitable particularly as door colours or for adding colour highlights.

Carcass colours:
The Classic series offers numerous additional options besides the classic light grey and anthracite carcass colours.

Incidentally:

C+P is a true specialist for tasteful and efficient furniture made of steel!
Over several decades, we have developed a mastery of this field that is virtually unsurpassed. So it is hardly surprising that our customers have made C+P the market leader in several product segments.
